Metro Motor

YOUR PARTS. YOUR CHOICE.

OEM vs. Aftermarket Parts

OEM parts are made by your car's maker. Aftermarket parts are copies made by someone else. Here is what that means for your car.

	OEM (factory)	Aftermarket (copy)
FIT	Made for your car	Fits right just over half the time
SAFETY	Built to the original crash design	May not crash like the original
SENSORS	Made to work with radar and cameras	Can interfere with radar
WARRANTY	Covered by your carmaker	Not covered by your carmaker
LEASES	Meets lease terms	Some leases prohibit it

How to get OEM parts

01
Ask your insurer
Request OEM parts and get the answer in writing.

02
Check your policy
Some policies include OEM coverage.

03
Pay the difference
We'll show you the exact amount before any work.

Our recommendation: OEM.

It's your car and your choice, and we'll repair it the way you decide.

My parts choice

☐ **OEM (factory) parts.** I agree to pay any difference my insurer doesn't cover.

☐ **Aftermarket parts,** as approved by my insurer.
